**Tips for Drivers**

**Be alert**
Expect cyclists on the road. Watch for cyclists on the road. Treat them as you would any slow-moving vehicle.

**Patience, not patients**
Patience, especially on the road, is a virtue, and can save lives.

**Your patience may involve**
- Waiting until it is safe to pass a bicycle and refraining from tailgating.
- Giving cyclists the right of way when the situation calls for it.
- Allowing extra time for cyclists to go through intersections.
- Recognizing road hazards that may be dangerous for cyclists and giving cyclists the necessary space to deal with them. In conditions where there is not enough room for a cyclist to ride to the right, they are allowed to ride closer to the lane of traffic, and sometimes even in the lane of traffic.
- Never engage in conduct that harasses or endangers a cyclist. Above all: Be tolerant. Be understanding. Be careful.

**3 foot rule**
Do not pass a cyclist until you can see that you can safely do so. You should allow ample space between your vehicle and the bicycle and make sure you do not place the cyclist in danger. If you pass too closely the drag from your car can pull a cyclist off course and cause the rider to swerve out of control.

**The right behavior**
Watch out for cyclists when you are turning right. A bicyclist may well be to the right of you and planning to go straight at the same intersection. Do not speed ahead of the bicyclist thinking you can negotiate the turn before they reach your car. The cyclist may be going faster than you think and, as you slow to make the turn, the cyclist may not be able to avoid crashing into the passenger side of your vehicle.

**On your left**
Also look for cyclists when making a left-hand turn.

Cyclists who are crossing straight through the same intersection in the opposite direction may be going faster than you realize. It is particularly dangerous on a descending slope, when cyclists pick up more speed.

**A back-up plan**
Bicycles, and the people who drive them, come in all shapes and sizes. When backing out of your driveway always look to see if someone is riding in your path. Children on small bikes might be hard to see. Drive slowly and look carefully.

**Egress etiquette**
After parallel parking, make sure the coast is clear for opening the car door to exit. Make sure there are no cyclists riding alongside your car or fast approaching. By using the rear view mirrors and by turning around, a driver can spot an approaching cyclist and circumvent a disaster. A cyclist cannot anticipate when a driver will open a door, but a driver can easily detect a cyclist who may be in the line of danger.

**Respect**
Cyclists have a rightful spot on the road. Cyclists also positively impact the environment with each revolution of their wheels by opting to ride rather than drive. Do not resent cyclists. Replace frustration with a smile every time you see a cyclist.

**The use of your horn**
Do not honk unnecessarily at cyclists. If the need does arise to honk your horn to alert a cyclist that you are about pass, do so at a respectable distance. If you are too close, the noise itself can cause a cyclist to lose his or her bearings and create a hazardous situation for both you and the cyclist.

**Try it, you'll like it**
If you can't beat them, join them. Ride a bike. It may just change your life. Riding is good for you and good for your environment. At the very least, it will give you a better appreciation for the problems cyclists face every day on the road with respect to motorists.

**KRS 189.010 Definitions:**
A bicycle is considered to be a vehicle that uses muscular power.

A “Vehicle” includes: All agencies for transportation of people or property over or upon the public highways of the Commonwealth; and All vehicles passing over or upon the highways.

**KRS 304.39-050(1),**
is interpreted to mean that a pedestrian is a person who is not actually operating, riding in or upon, entering, or alighting from a “kind of motor vehicle,” as defined by insurance office administrative regulation at the time his injury actually occurs.
KRS 189.231 states that all vehicles SHALL (must) obey traffic controls applicable thereto, meaning stops lights and stop signs for example.

KRS 189.287 Bicycle safety regulations and standards:
The Transportation Cabinet shall promulgate administrative regulations pursuant to KRS Chapter 13A to set forth standards for bicycle equipment and the safe operation of a bicycle. The regulations shall include requirements for lights, reflectors, and audible warning devices. Bicycles and riders which comply with the regulations promulgated under this section are exempt from municipal and other local government regulations concerning safety equipment but not method of operation. In promulgating the administrative regulations, the Transportation Cabinet shall permit use of lightweight modern technological substitutes for lights, reflectors, and bells. The purpose of this section is to encourage bicycling and bicycle touring in this state by enabling bicycle riders to make use of modern technology to make their presence known to other users of the road.

601 KAR 14:020. Bicycle safety standards. Operation of Bicycles. A bicycle shall be operated in the same manner as a motor vehicle except the following traffic conditions shall apply:
(1) A bicycle may be operated on the shoulder of a highway;
(2) If a highway lane is marked for the exclusive use of bicycles, the operator of a bicycle shall use the lane whenever feasible;
(3) Not more than two (2) bicycles shall be operated abreast in a single highway lane. (20 Ky.R. 1508; Am. 2037; eff. 2-10-94.)
